

William Birch & Sons Ltd

Construction & Restoration Specialists

William Birch & Sons Ltd has completed many projects in the region due to its expertise in working closely with a range of management methods to ensure the highest quality standards. Some past projects include a new-build addition to York National Trust. William Birch & Sons Ltd

Whitby Abbey Banqueting Hall.
Conversion to visitor centre for English Heritage

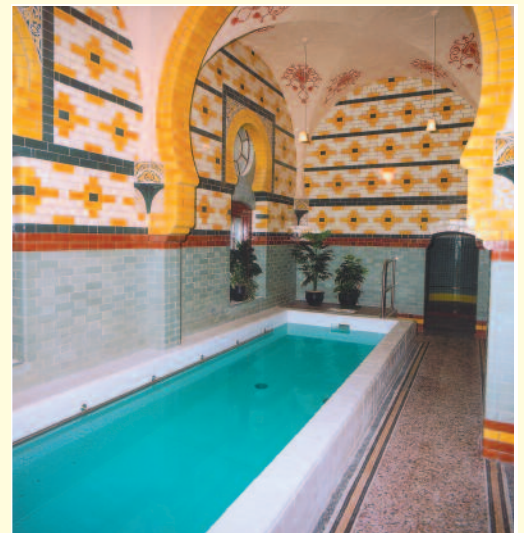

William Birch & Sons Ltd has been fortunate over its 130 years of existence to have had the opportunity of working on a large number and variety of heritage properties.

From Abbey to Stately Home, from Gazebo to Tempetio, from Concrete Bunker to Turkish Baths, the company can put together the contract team to satisfy the individual techniques, crafts and sensitivity demanded by each project.

Recently, the Birch team extended its range of expertise to bring back to life the shell of the Banqueting Hall at Whitby Abbey with a technically demanding new envelope over the ruined walls, also incorporating a sympathetic Visitor Centre within. An altogether different challenge has been the restoration to operational condition of a three storey habitable underground Cold War reinforced concrete bunker.

One of the most eye catching projects completed to date by the company has been the repair and restoration of the dazzling tile mosaics and decorations of the famous Harrogate Turkish Baths together with the upgrading of the essential systems which ensure its distinctively warm atmosphere.

As one of Yorkshire's leading contractors William Birch & Sons Ltd is always looking for the next challenging project.

Turkish Baths. Restoration for Harrogate Borough Council
